## SUMMARY

I'm a front-end engineer who is driven by curiosity, creativity, and the ambition to empower people through tech. Prior to becoming a front-end-engineer, I lived for the evenings where I would take introductory programming classes at my local library. I began tinkering with hardware, building webpages for friends and family, and learning how to write/run scripts that would automate my day-to-day tasks. Along the way, I fell in love with the logic, the opportunity, and the independence that software development offered me.

## PROJECTS

### TURING YEARBOOK

[https://github.com/CervAnn/turing\\_yearbook](https://github.com/CervAnn/turing_yearbook)

Turing Yearbook is a week-long solo project that involves building a webpage using ReactJS, HTML, and CSS. It is a beginner's attempt at learning to manipulate components, JSX, and event handlers in React.

### WOOKIEBOX

<https://github.com/CervAnn/WookieBox>

WookieBox is a week-long partnered project that is designed to solidify ReactJS concepts and TDD using Enzyme and Jest.

### POKEBALL OF FORTUNE

[https://github.com/CervAnn/Pokeball\\_of\\_Fortune](https://github.com/CervAnn/Pokeball_of_Fortune)

Pokeball of Fortune is an adaptation of the game Wheel of Fortune. It is a three-person, week-and-a-half-long group project that centers on affirming the fundamentals of JavaScript, jQuery, HTML, CSS, and TDD using Mocha and Chai
